

**Year 3**  
**(Term 5 - Week 2)**

**Session 2 — Can you explain it?**  
**Add two 3-digit numbers by partitioning and recombining (no regrouping)**

$$683 + 312 = 371$$

Ollie has completed this calculation and thinks the answer is 371.

Why is he incorrect?

**Session 2 – Can you apply it ?**  
**Add two 3-digit numbers by partitioning and recombining (no regrouping)**

$$\mathbf{A + B = 798}$$

A and B are 3-digit numbers.  
Find possible values for A and B.
